Management, First
Nations Capital Projects,
Water and Wastewater,
Asset Management and
Development, Contract
Management*

PROFILE

Mackenzie is a professional engineer-in-training who has managed a wide variety of Indigenous projects over his Career. First Nation communities have been the focus of his work where he has demonstrated his exceptional ability to work collaboratively within a project team to accomplish objectives.

Mackenzie is very experienced working with government funding agencies such as Indigenous Services Canada and is familiar with their guidelines for project activities and procurement processes. Notable projects experience includes road construction and rehabilitation projects, a police station turnkey solution project, water treatment systems, and a wide range of infrastructure improvement projects.

An Indigenous person from Beausoleil First Nation, Mackenzie has provided valuable communication skills in his meetings with other First Nations from his experiences growing up and working on reserves throughout his life. His excellent work ethic and leadership skills have enabled him to effectively manage resources and meet deadlines. A critical thinker, he has a proven ability to solve problems logically, considering the risks and implications of all viable solutions.
